Stains Easily
 Colors can Fade
 Can Split
 Extremely Heavy
 Expensive
 Sags and Droops
 Molds and Mildews
 Cannot recycle
 Retains Heat
 Swells from moisture

Endeck capped cellular PVC vs all others.

It takes a pretty thick skin to stand up to all the punishment delivered to your deck.

With all the activity intended for your new deck, plus everything Mother Nature will throw at it, you need a deck plank with a tough outer shell. Endeck capped cellular PVC is made to withstand most conditions—environmental and manmade—from the constant punishment of UV rays from the sun, to rain, sleet and snow, to the barrage of kids, neighbors and friends scuffing their shoes, dragging deck furniture, and dropping ketchup, mustard and hamburger grease all over it. Endeck is cooler to the touch, does not splinter, and is slip resistant - wet or dry — making it a safer deck choice for your entire family.

Endeck Employs a Tougher HardCover™ Capstock

- Proprietary formulation
- Years of proven weatherability
- Consistent strength and endurance
- No moisture penetration or delamination
- Stain-resistant finish
- Excellent traction wet or dry
- Code approved
- Class-A flame spread

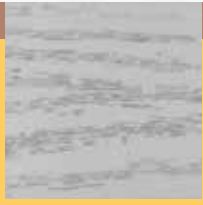

Introducing Endeck Woodland™ Series.

Colors to complement your home and landscape; strength to complete your low-maintenance lifestyle.

Endeck captures the classic look and feel of real wood, but leaves the headaches and extra maintenance time and expense behind. The embossed woodgrain on both sides of Endeck's capped cellular PVC deck boards mimic the look and feel of real wood. Even though Endeck with HardCover™ Technology may look like wood, your new deck certainly doesn't act like wood.

No Scraping • No Sanding • No Staining • No Twisted, Cracked or Warped Boards

Ashwood

Beechwood

Olivewood

Colors shown are by the lithographic process and may vary slightly from actual product.

Endeck is 100% capped cellular PVC, with no wood fibers or fillers. It won't rot or crack like wood or composites and capped composites.

Endeck Woodland™ Series is stain-resistant, providing excellent traction - wet or dry.

It takes a pretty, thick skin to stand up to all the things that can happen to a deck. Endeck employs a tougher, proprietary HardCover™ capstock with years of proven weatherability, consistent strength and endurance, providing excellent traction wet or dry. Endeck is fade-resistant, stain-resistant, scratch-resistant, slip-resistant, and engineered to withstand everyday punishment from nature and your neighbors. Rest assured Endeck is also safe for children and pets remaining cooler to the touch and splinter-free, year after year.

Tough inside and even tougher outside.

Endeck boards are strong, durable, engineered to resist sagging, and lighter in weight than composite, capped composite or treated wood deck boards. Endeck boards meet or exceed stringent AC10 and AC174 standards, and are CCRR-0144 code approved.

Enrail® Vinyl Railing Systems.

Decking and Railing that go hand-in-hand.

Enrail is an easy-care railing system that has great architectural appeal for today's homes.

The Enrail vinyl railing system is engineered for a higher standard of living, so you can trust your rail for a lifetime of performance and good looks. Enrail is more than just durable, sturdy and safe. You receive the perfect complement to your home's architectural style with ultimate flexibility of design options. Enrail vinyl railing also meets or exceeds stringent AC10 and AC174 standards, and is CCRR-0107 code approved. Available in three handrail styles (at right).

Series 100
2" x 3.5" railing is contemporary and straightforward

Series 200
Add real architectural appeal with the strong lines of the T-Rail system

Series 300
Soft curves of the Small Contour Rail work to conceal the amazing strength inside

Unlike wood, Endeck Woodland Series Decking comes with an exceptional limited Lifetime Warranty.

Enduris warrants its Endeck Decking and Enrail Railing products, subject to the terms, conditions and limitations (see individual warranty details at www.enduris.com), to be free from defects in material and workmanship. When installed under normal conditions and proper use, Endeck and Enrail will not peel, pit, rot, blister, crack, abnormally weather or be consumed by insects.
