

Case Study

Endwood® High Performance Capped Cellular PVC Fencing

Foxtail Homes • Boise • Idaho

Situational Analysis:

3M Developments chose Endwood because they wanted something completely unique for the Foxtail development. 3M Developments had tried composites, vinyl and wood and were not happy with the long term performance of any of them. Favoring the idea of being the first developer in Idaho to use Endwood fencing, they selected Endwood for its fade resistance and long term reliability ensuring a fence that would look just as good when they built the last house as it did when they built the first house. The result was a very attractive product the developer is extremely pleased with.

"... the Endwood fence is the best composite-like fence product I have worked with and is by far the most aesthetically pleasing that I have seen. I highly recommend Endwood fencing to any homeowner or developer who would like the best looking product on the market with zero maintenance to set yourself apart from the competition!"

~ Mark Newman, President – Boise River Industries

Ultra-Low Maintenance • Lighter Weight • 30 Year Fade and Stain Warranty • No Wood Fillers

If this is
your fence,
it's also your
reputation.
